SUMMARY

Frontend developer specializing in React, TypeScript, and WordPress, with 2+ years building and maintaining 100+ production websites. Focused on responsive, accessible interfaces and reusable components that turn client requirements into maintainable solutions.

WORK EXPERIENCE

Web Developer — Santos Digital

April 2024 – Present

- Built and maintained 100+ WordPress sites, handling custom development, integrations, and ongoing maintenance across a varied client base.
- Developed custom JavaScript widgets and Elementor components that extended functionality beyond standard plugins — interactive pricing tables, before/after image sliders, and dynamic loop grids.
- Built responsive, accessible UI components that improved cross-device compatibility across client sites.

Frontend Developer Intern — msg global solutions South East Europe

Oct – Nov 2023

Thriv3 program

- Three-week program covering functional and technical consulting, frontend and backend development, and agile methodologies (Scrum, Waterfall).
- Recreated a website with a partner and integrated an API to fetch and display live data.

PROJECTS

The Scrollforge — React, TypeScript, Supabase

- Interactive tabletop-RPG character sheet, built as a web app and installable PWA for tracking characters during play.
- github.com/mihajlo252/the-scrollforge • thescrollforge.netlify.app

The Gathering Table — React, Supabase, PWA

- Group event-planning app with Google OAuth login, opt-in Google Calendar sync, and web push notifications via VAPID keys and Supabase Edge Functions.
